

***One (1) 1989 Freightliner Tank Truck to be sold "AS IS"***

**ADDITIONAL INFORMATION**

- This truck was a "used" unit purchased by the seller in 1996
- At purchase prior to delivery, fifth wheel and bunk were removed
- Retrofitting was undertaken to accommodate the installation of a 2500 gallon water tank including plumbing and electric start wired directly from truck for a water pump (not included)
- The aluminum rear compartment is sizeable and accommodated an 18 hp gas powered water pump (not included)
- The unit was used as a water shuttle tanker for a fire department
- Side fender storage custom built to accommodate 3 x 10' lengths of light weight hard suction hose (hose not included)
- 2 saddle fuel tanks approximately 400 litres each
- An external compressed air point was installed to keep air brakes fully charged
- This truck has performed well for transporting water and is being replaced due to its service life of 25 years being met and NFPA standardization requirements for this application
- New rear tires in fall 2013
- Less than 200 km driven since June 2014 Safety Inspection Certification
