

Why Check and Record Your Internet Access Performance

- 1) Helps the community of Iron Bridge and CENGN verify and track the impact of the new WIFI fixed wireless residential broadband internet access service from Leepfrog Telecom.
- 2) Helps the residents of Iron Bridge see the level of improvement in their internet access performance, before and after the new services are available.
- 3) Helps other northern communities see the impact this new broadband service approach can provide.

Free Simple and Easy to Use Performance Tool

CENGN has worked with CIRA (Canadian Internet Registry Association) to develop a custom internet performance tool for testing internet performance and recording results for the community of Iron Bridge.

To run the performance tool, enter this URL in your browser: <https://performance.cira.ca/ironbridge>
